

Type C13 Concentric Room Sealed  
Type C33 Concentric Room Sealed

## Pricing Schedule & Order Form

**Please complete and attach this order form to your official order paperwork.**

Company Name:

Contact Name:

Telephone Number:

Customer Order No:

Quotation Ref:

Project Ref:

Delivery Address:  
(if not on main order)

## **BEFORE SELECTING YOUR FLUE SYSTEM please refer to these notes.**

### Note: Flue component materials and application

Some of the flue components listed in this document are manufactured from non UV stabilised polypropylene, and are not suitable for external use.

Flue discharge and air inlet terminals are manufactured with enamelled galvanised steel outer skin, and terminal construction is suitable for external use.

For installations requiring external flue runs, Hamworthy recommends the installation is completed in stainless steel. Please consult with our technical department for further details. Tel: 01202 662500.

All flue systems must have adequate provision for draining condensate, and must be fitted with a condensate drain kit.

Note: For full details relating to the maximum length of flue systems and maximum number of boilers or maximum load suitable for use with any specific flue system please refer to Fleet Wall Hung sales brochure document number 500002562.

Note: All items indicated in the drawings as shaded items are included within the relevant flue terminal kit. All extendable flue terminal kits include a condensate drain fitting and trap that must be installed as close to the boiler as practically possible.

**Prices quoted here assume that the flue component order is placed at the same time as the Fleet boiler order and is for delivery to the same site. Where flue components are not delivered at the same time as boiler, there will be a delivery charge of £37.**

**Value Added Tax will be applied to all goods and services at the appropriate rate.**

**All goods and services are subject to our Conditions of Sale (copy available on request).**

**All prices shown in this price list are valid for 60 days from the date of the attached quotation.**

**BEFORE SELECTING YOUR FLUE SYSTEM please refer to notes at the front of the form on flue materials and application.**

**Select components from one system type only**

System Type	HHL Part Number	Description	Unit Price £	Quantity	Total £
<b>Concentric room sealed flue systems</b> <b>Type C13 - Polypropylene</b> For boiler models F40W – F100W 80/125mm diameter 	532511155	Flue terminal wall kit with elbow C13 80/125 dia	64
