Quotation Ref:

Project Ref:

STOURBRIDGE LIONS MEDICAL CENTRE

Delivery Address:
(if not on main order)

BEFORE SELECTING YOUR FLUE SYSTEM please refer to these notes.

Note: Flue component materials and application

The flue pipe components listed in this document are manufactured from non UV stabilised polypropylene which are not suitable and therefore should not be used for external flue runs.

Horizontal flue terminals and vertical flue terminal kits are manufactured from stainless steel and are suitable for external location. Vertical flue terminal kits provide for 1 metre extension beyond the roof penetration.

For installations requiring external flue runs Hamworthy recommends the installation is completed in stainless steel. For further details please call our technical department. Tel 01202 662500. All flue systems must have adequate provision for draining condensate.

Select components from one system type only.

Prices quoted here assume that the flue component order is placed at the same time as the Dorchester water heater order and is for delivery to the same site. Where flue components are not delivered at the same time as water heaters, there will be a delivery charge of £37.

Value Added Tax will be applied to all goods and services at the appropriate rate.

All goods and services are subject to our Conditions of Sale (copy available on request).

All prices shown in this price list are valid for 60 days from the date of the attached quotation.

System Type	HHL Part Number	Description	Unit Price £	Quantity	Total £
DR-FC Evo 80/95/120 System Type B23 - A Open flue, vertical terminal	563605440	B23 open flue termination kit 130mm dia including flue discharge terminal 130 dia, air inlet basket heater connection 130mm dia	188	1	188
