COMMENTS ON QUOTED METRIC TANK:

Additional components: Prices quoted are only valid on individual items if they are ordered with the tank.

Additional carriage charges may apply if ordered separately.

Tank colour is cream

The Ball Valve Housing increases the height of the tank by 500mm. Standard Ball Valve Housing dimension is 1000x1000x500mm

I HAVE ADDED A RAISED FLOATVALVE HOUSING C/W 'AB' AIRGAP TO MAXIMISE

THE CAPACITY - PLEASE ADVISE. (THIS IS A MEDICAL CENTRE, HENCE THE

'AB' AIRGAP).

Notes.

1. Dewey Waters Ltd. Conditions of Sale apply, which are available upon request.
2. Price does not include for subsequent visits to non-conforming sites.
3. Price does not include for elevating components onto a roof or any other structure above ground level.
4. Price does not include for offloading components which are to be positioned within 6m on the same level as the tank location for our attendance to assemble.
5. If the tank has to be pushed to any wall after assembly or if the available working space is reduced at a later stage, by the building of walls etc, the problems will rest with others.
6. Liquidated and or ascertained damages are not applicable to this contract.
7. Any lighting, power, scaffolding that may be required is the responsibility of others.
8. Tanks to be assembled on a base certified by others.
9. It is the customers responsibility to ensure that external ladders quoted are suitable.
10. Guardrailing may be necessary to Satisfy Health and Safety Regulations. The type of railing required is dependant on the tank height, distance from good ground level, access etc. Please confirm which guardrail arrangement is required so that we can make the necessary inclusion.
11. Unless otherwise stated standard delivery Monday - Friday is included between the hours of 8.00am to 4.30pm. Out of hours, weekend or timed deliveries will incur an additional charge on application.
12. Where installation is included working hours are 7:30am to 5:00pm Monday to Friday unless agreed otherwise in writing.
13. Our Price includes for a maximum of one hour of induction training on Site. Any additional time spent will be charged at our hourly rate.
14. WHERE BASE SUPPORTS ARE QUOTED FOR IT IS ASSUMED THE EXISTING SLAB IS STRUCTURALLY SOUND, SUITABLE FOR THE ANTICIPATED LOADS TO BE APPLIED TO THEM AND BE WITHIN 20MM IN ANY 6 METERS.
15. Testing / commissioning of the tank is the Customers responsibility as it is seldom this can be carried out immediately on completion of erection. Erectors will not stay on site or return to witness tests unless by special arrangement. It is essential that the tank be filled and tested within 10 working days of complete assembly and for it to remain filled thereafter.
16. VAT Extra. This quotation does not constitute an offer.

Terms net 30 days subject to approval of credit facilities. Note: This quote is valid for 90 days.
