## Fleet Wall Hung Boiler Flue Systems

Type B23 Flue Headers

Pricing Schedule & Order Form

Please complete and attack	h this order form to your official order paperwork.
Company Name:	
Contact Name:	Telephone Number:
Customer Order No:	Quotation Ref:
Project Ref:	
Delivery Address: (if not on main order)	

## BEFORE SELECTING YOUR FLUE SYSTEM please refer to these notes.

Note: Flue component materials and application

Some of the flue components listed in this document are manufactured from non UV stabilised polypropylene, and are not suitable for external use.

Flue discharge and air inlet terminals are manufactured with enamelled galvanised steel outer skin, and terminal construction is suitable for external use.

For installations requiring external flue runs, Hamworthy recommends the installation is completed in stainless steel. Please consult with our technical department for further details. Tel: 01202 662500.

All flue systems must have adequate provision for draining condensate, and must be fitted with a condensate drain kit.

Note: For full details relating to the maximum length of flue systems and maximum number of boilers or maximum load suitable for use with any specific flue system please refer to Fleet Wall Hung sales brochure document number 500002562.

Note: All items indicated in the drawings as shaded items are included within the relevant flue terminal kit. All extendable flue terminal kits include a condensate drain fitting and trap that must be installed as close to the boiler as practically possible.

Prices quoted here assume that the flue component order is placed at the same time as the Fleet boiler order and is for delivery to the same site. Where flue components are not delivered at the same time as boiler, there will be a delivery charge of £37.

Value Added Tax will be applied to all goods and services at the appropriate rate.

All goods and services are subject to our Conditions of Sale (copy available on request).

All prices shown in this price list are valid for 60 days from the date of the attached quotation.

## BEFORE SELECTING YOUR FLUE SYSTEM please refer to notes at the front of the form on flue materials and application.

Select components from one system type only

System Type	HHL Part Number	Description	Unit Price £	Quantity	Total £
Modular open flue headers	562511020	Flue header kit extendable B23 150 dia for	404		
Type B23 - Polypropylene		2 boilers - models F40W - F100W			
For boiler models F40W – F100W		Including:			
150mm diameter with 150mm diameter extension pipes		Flue header 150 dia			
P. P. C.		Condense drain 150 dia			
		Condense trap			
A		Connecting flue to boiler flue outlets 80 dia			
		Air inlet filter			
620 max 560 crs	Optional:				
88 min	562511022	Flue support elbow 150 dia x 90°	85		
		with wall bracket			
	532511122	Flue elbow short radius 150 dia x 90°	27		
300	532511121	Flue elbow short radius 150 dia x 45°	27		
	532511135	Flue pipe 150 dia x 1000mm	34		
	532511134	Flue pipe 150 dia x 2000mm	55		
	532511145	Flue terminal roof B23 150 x 1570mm	270		
Shaded items are included in header	532511033	Flue wall bracket 150 dia	10		
kit - 562511020	532511174	Flue flat roof flashing 150 dia	22		
	532511178	Flue pitched roof flashing 150 dia 25° to 45°	40		
				Sub Total	
Modular open flue header extension	562511017	Flue header extension B23 150 dia	168		
Type B23 - Polypropylene		for single boiler			
For boiler models F40W – F100W 150mm diameter		Including:			
560 crs		Flue header 150 dia			
		Connecting flue to boiler flue outlets 80 dia			
		Air inlet filter			
Shaded items are included in header extension kit - 562511017
